Tod - I am working on your "Subscription Updating" search. Found a 1998 New York Times article that talks about products that search for updates for you: Oil Change from CyberMedia (McCaffee), Update AnyWare from Green Tree and TuneUpDate from Quarterdeck. These products look at the software on your hard disk, make a profile of the drivers and other software and then go out on the Internet to compare your software with its database of known products, etc. Let's you download and install new version. Let me know if this is what you are looking for. I can pull more info on the products.
